The operation of a new railroad, the introduction of improvements on an of more or less consequence. The Broad way Cable road proves itself no exeception to the rule.

This morning the speed of the cable on the downtown sections was increased from six miles an hour to seven and a half miles. Car No. 148 going to the Hattery, stopped to permit passengers to alight at the corner of Fulton street and Broadway, at noon to-day George Blakely, who drives a truck for the Dennison Manufacturing Company, noticing the car coming to a full stop attempted to cross the track. Almost at the same moment the gripman sent the car ahead, it came in collision with the hind wheel of the truck, pushing the vehicle ahead for a distance of twenty feet. When the car was brought to a standstill, the heavy iron axle of the truck was found to have been bent as if made of lead.

The officers of the company, however, allege that the accident could not have due to the increased rate of speed of the cable, as the old rate its said to be maintained between the hours of 3 o'clock A. M. and 6 o'clock P. M. because of the interference of truck traffic at such time. Between 6 in the evening and 8 in the morning, however, the cable travels more rapidly.

On Sunday the high rate of speed will be maintained all day. The speed of the cable on the middle and uptown sections remains unchanged.

The letter concluded by saying that "Sossy Barsuk," a young widow who had boarded in the same but se where the White family lived, had followed White to "Madelphila, and would thereafter be to him as a wife. "She is," wrote the young man, "the lideal of my highest aspirations. In her presence I am happy. Without her my life is a void."
